

# eXperience—THE GAME™ Dome of Resolution

## Aurodyn Design

The unique concept of the Game Dome calls for an efficient means of creating space that is aesthetically interesting and truly satisfying. The patent-pending geometric structural systems developed by Aurodyn enable the construction of space that inspires, captivates and satisfies the human spirit.

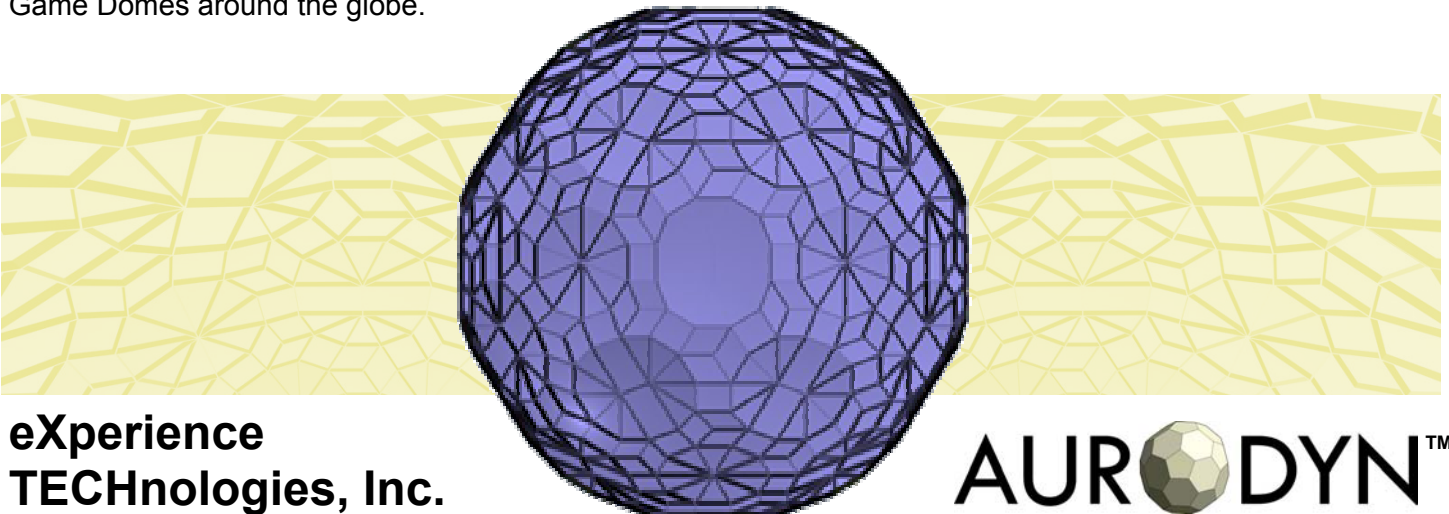

Aurodyn's systems are based on the same golden geometry commonly exhibited in nature and share the qualities of beauty, efficiency, strength and economy of natural structures. This means using less material and expense to create exceptionally engaging and highly functional structures.

## eXperience—THE GAME™ (XTHEGAME.com) as a life sized, "Living Theater."

The ideal partnership between Aurodyn and eXperience-TECH for the Game Dome project is driven by the need for a strong and lightweight system that is easy to assemble and disassemble. The modular geometry lends itself to mass production lowering the cost of components and bringing an efficient way to scale up to hundreds of Game Domes around the globe.

## Benefits of the Game Dome

- cost effective
- nice finish
- lightweight
- strong
- modular
- efficient packing
- golden geometry
- easy assembly/  
disassembly
