

GAMEschool eXperience

KENYA, AFRICA - OAKLAND, CA (EDUCATIONAL / PEACE

Our 501(c) 3 Non-profit Global Community eXperience (GCX) is introducing an incredible project through the HUB network! Through HUB we are refocusing our efforts into a HUB/GAME project to build an educational/peace bridge between a school district in Oakland, CA and a school in Kenya, Africa. Ultimately, a location will be chosen in Kenya to construct a permanent Empowerment / Learning Center / School
(See Game Dome on reverse side).

Using the technologies of our resourceful time in history we will digitally connect (conference screens and online broadcasting) these two locations, while having the students and facilitators of both Oakland and Kenya locations play the Game simultaneously. This will be an intriguing multi-cultural eXperience for the participating students and all who will be watching the live broadcast.

Our Past and Current Projects;

Currently, we are active within Bay Area schools, introducing this powerful interactive learning program. Amazing results occur whenever our program is conducted within a class setting, as it was designed to create real community, while reasserting meaning and purpose back into academics. We have trained Game School Ambassadors in Napa, CA, Oakland, CA, Benecia, CA, Santa Cruz, CA, Crown Heights, NY, Santa Cruz, CA. Visit <http://www.xthegame.com/game-school.html> for more information on GAMEschooling including testimonials.

A Multi-Cultural Educational Program Designed to:

- Rejuvenate the international educational system, by reintroducing powerful principles like passion, intention, awareness and creativity;
- Inspire students to create & discover their personal and global intentions, commitments and goals;
- Facilitate an ongoing cross-cultural dialogue forum between the targeted students and schools;
- Enable peace and conflict resolution locally within these communities through dialogue and collaborative action;
- Foster nation to nation political forums and conflict resolution;
- Uplift awareness of local and global issues and opportunities;
- Help positively change the consciousness (way we think), enabling real action for peace and self-sustainability to proceed;
- Provide the local community with materials and instructions for complete self-sustainability (Entrepreneurial and eco-gardens and green houses);
- Provide students and local citizens with modern educational facilities and state of the art hardware and software;
- Connect students and local citizens to a growing family of international peace, aid, and educational organizations;
- Provide one student from each location with a 1 month trip in which the two individuals exchange locations and roles in the world.
