

The Los Gatos eXperience

EXPERIMENT & COMMUNITY GAME

What is the Los Gatos Community Game?

“It is high tech 3-D Living Theater. As a community game simulator it offers the greatest of movie possibilities.”

The Town of Los Gatos is not only the location, but it becomes the props for an eXperimental Living Theater. The resident townspeople and businesses are both the actors and audience. The myriad of stories and eXperiences from these people become the living script for this Silicon Valley haven, tucked away as a “gem of the foothills.”

This interactive community showcase is breaking way for a whole new genre of entertainment. It is a story, a game a marketing tool, an educational system, a web infrastructure and a new forum for people to communicate and relate with each other.

LG Community Game pushes the bounds of “community building” to the literal. Replicating “realtime” physical world is both an artform and an engaging business model designed to extend the power of the web to become an interface to a wealth of content and information.

In the light of the global tremors and rumors of tremors based on instability and insecurity, “Home” becomes ever more important. Those in your communities become more of survival partners into the 21st century...

Numerous ways have been created to extend life into the virtual realm:

- Be an active participant
- Help create focal areas of interest and form “interest groups” to work with
- Support your LOCAL merchants (online and in Realtime)
- Network with others
- Learn with like-minded and counter pointed
- Earn through a progressive community marketing program
- Give back to the local community and also to a global cause...

What is the Community Game™?

An infrastructure for people in the community to learn to build and add content to the eXperience. Training will be offered to those in the community interested in creating digital storyboards, that get fed into the eXperience, giving its heart and soul.

Events

As a central feature to our Los Gatos virtual reality eXperience, we will maintain a community events calendar and also offer community members the capacity to create and maintain their own calendars. Through “Speak to the Role Model” Forum community members can interact with community dignitaries and professionals. This will become a component of our Community Game™ simulator.

What to look forward to playing the Community Game™

- Fly around the world from space and land in different local and global locations
- Learn directly from Community “Role Models” and create your own cast of “Avatar” characters
- eXplore local history and share your culture as part of an historic “Millennial Timecapsule™”
- Make personal, school and business connections globally, while interacting locally
- Join in live “Virtual Forums™” networking with (new) friends of like interest
- Gain “eXperience” through greater awareness and understanding
- Help generate resources for local and global non-profit projects that support an expanding network
- Earn “Community Credits™” and win great gifts, prizes and trips!
- Vote on relevant issues and concerns
- Add creative content to an evolving world
- Learn about other cultures around the world
- Share your dreams and fantasy impressions
- Help create a new world....
